HHS AWARDS \$460,637 TO UNIVERSITY OF NEW MEXICO TO SUPPORT LOCAL RESEARCH TO PREVENT ILLNESS AND IMPROVE HEALTH

HHS Secretary Tommy G. Thompson today announced that University of New Mexico Health Sciences Center will receive \$460,637 to fund community-based research into local disease prevention and health promotion needs. The grant will support Participatory Action for Healthy Lifestyles, which will look at a school-based physical activity and nutrition program aimed at decreasing obesity and related-diseases, such as Type 2 diabetes, among the local Native American Indian population.

“This grant will help identify critical health research needs of the American Indians in New Mexico and Arizona, so that they can better target community efforts to promote good health and prevent illness,” Secretary Thompson said. “By supporting such local projects across the country, we are helping to develop and implement effective local strategies to improve the health of residents.”

The grant is one of 25 similar HHS awards across the country to support research in a variety of areas such as physical activity, diabetes, youth and school-based health, nutrition, obesity, asthma, drug prevention, tobacco prevention and violence/injury prevention. Findings from these research projects should assist communities develop public health policies and practices designed to promote health and reduce disease, disability and injury among specific populations.

The awards are being made under the extramural prevention research program at HHS’ Centers for Disease Control and Prevention (CDC). Grantees were chosen from more than 300 applicants.

“Community-based, peer-reviewed research is the foundation of the public health system. This program signals CDC’s commitment to strengthen infrastructure and community public health capacity through peer-reviewed research that has immediate relevance to the needs of public health practitioners, community policymakers and concerned citizens,” said Dr. Julie Gerberding, CDC director.
